

Unlock new possibilities with **Visa Platform Connect**

Joining TSYS, Fiserv and our proprietary ACH engine, Visa Platform Connect (VPC) gives you Visa-powered capabilities and expanded functionality for boarding eCommerce merchants through one partner, one platform and one experience.

Place more merchants processing card-not-present transactions today, with card-present capabilities coming soon, all through the same application process, onboarding experience, dashboard, reporting tools and support you already know.

Improved authorization rates

+4.6% lift in CNP authorization rates with Visa-powered optimization capabilities

3D Secure

Reduce fraud and shift liability on authenticated transactions

Unified checkout

Support Apple Pay, Google Pay, Click to Pay and traditional card payments through a seamless checkout experience - including connections to WooCommerce, Shopify and more

Direct Visa connectivity

Optimize card-not-present transaction performance with direct access to the Visa network

Network tokens

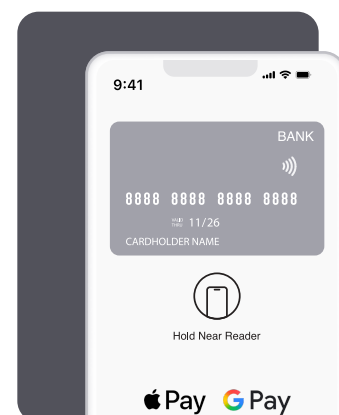

Improve security and payment performance, increase approvals and reduce friction

Real-time account updater

Reduce declines from outdated card information

Expanding capabilities, keeping what works

- Recurring payments vault
- Hosted payment forms
- API capabilities
- One application and onboarding process
- One support team

One platform.
Four payment rails.
More ways to say yes.
