

# Unlock new possibilities with Visa Platform Connect

Joining TSYS, Fiserv and our proprietary ACH engine, Visa Platform Connect (VPC) gives you Visa-powered capabilities and expanded functionality for boarding eCommerce merchants through one partner, one platform and one experience.

Place more merchants processing card-not-present transactions today, with card-present capabilities coming soon, all through the same application process, onboarding experience, dashboard, reporting tools and support you already know.

## Improved authorization rates

+4.6% lift in CNP authorization rates with  
Visa-powered optimization capabilities

## 3D Secure

Reduce fraud and shift liability on  
authenticated transactions

## Unified checkout

With support for Apple Pay, Google Pay, Click to Pay  
and traditional card payments through a seamless  
checkout experience.

## Direct Visa connectivity

Optimize card-not-present transaction performance  
with direct access to the  
Visa network

## Network tokens

Improve security and payment performance, increase  
approvals and reduce friction

## Real-time account updater

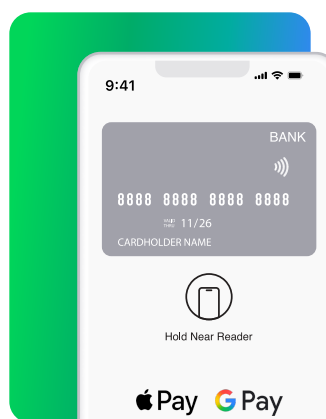

Reduce declines from outdated card information

## Tap into Visa-powered tools and integrations

Use ready-made CyberSource integrations with  
WooCommerce, BigCommerce and more

## Expanding capabilities, keeping what works

- Maverick gateway and dashboard
- Recurring payments vault
- Hosted payment forms
- API capabilities
- One application and onboarding process
- One support team

One platform.  
Four payment rails.  
**More ways to say yes.**
